# COLORADO DEPARTMENT OF EDUCATION AND COLORADO DIVISION OF VOCATIONAL REHABILITATION

# COOPERATIVE SERVICES HANDBOOK FOR YOUTH IN TRANSITION

A Supplement to the CDE/DVR Cooperative Agreement Summer 2005

Developed by the Colorado Department of Education (CDE) and the Colorado Department of Human Services, Division of Vocational Rehabilitation (DVR), this Cooperative Services Handbook was designed to assist DVR staff, educators, students and their families in the delivery of transition services. This handbook is a "desktop" version of the 2002 Cooperative Agreement between CDE and DVR. The information and examples in the Handbook are intended to be used as technical assistance tools for transition planning.

#### Introduction

Developed by the Colorado Department of Education (CDE) and the Colorado Department of Human Services, Division of Vocational Rehabilitation (DVR), this Cooperative Services Handbook was designed to assist DVR staff, educators, students and their families in the delivery of transition services. The Handbook is a "desktop" version of the 2002 Cooperative Agreement between CDE and DHS/DVR. The information and examples in the Handbook are intended to be used as technical assistance tools for transition planning.

The intent of this Cooperative Services Handbook is to assist students with disabilities to become employed by:

- promoting flexible and collaborative planning and service delivery among vocational rehabilitation, local education agencies and local school districts (both known as LEAs), and other state and community agencies for youth transitioning from school to work and/or post-school activities which will lead to employment;
- promoting accessible, timely and uniform vocational rehabilitation services for all Colorado students who require services as defined by the Individuals with Disabilities Education Act (IDEA) and the Rehabilitation Act;
- encouraging LEAs to develop, implement and promote pre-vocational services and career exploration for students with disabilities prior to the referral to DVR; and
- assuring that vocational rehabilitation services complement and do not supplant services provided by the LEAs and other agencies.

#### What Is Transition?

Under both the Rehabilitation Act and the Individuals with Disabilities Education Act, "transition services" are defined as a coordinated set of activities for a student, designed within an **outcome oriented process\*\***, that promotes movement from school to post-school activities, including any of the following:

- Employment (including supported employment)
- Post-secondary education
- Vocational training
- Continuing and adult education
- Adult services
- Independent living
- Community participation

The coordinated set of activities shall be based upon the individual student's needs, taking into account the student's preferences and interests and shall include:

- Community experiences
- The development of employment
- The development of other post-school adult living activities
- When appropriate, acquisition of daily living skills
- When appropriate, functional vocational evaluation

Transition services are defined by the IDEA Amendments of 1997, Sections 602(30) and 614(d), and the Rehabilitation Act Amendments of 1998, Title IV of the Workforce Investment Act of 1998, Section 7(37).

\*\* The outcome-oriented process for DVR means obtaining and maintaining employment.

# Who May Receive Transition Services

#### **Individuals with Disabilities Education Act**

Under IDEA, transition services are provided to students with disabilities who are 16 years of age (and younger if appropriate) who qualify for special education and related services.

IDEA applies only to students who-

- Have one of the disabilities listed in the Statute, and
- Are eligible for special education

Eligible disability categories, as defined in the Colorado Rules for the Administration of the Exceptional Children's Education Act, include: significant limited intellectual capacity, significant identifiable emotional disability, perceptual or communicative disability, hearing disability, vision disability, speech or language disability, traumatic brain injury, autism, or other physical disability, deaf—blind, and multiple disabilities with cognitive impairment.

IDEA defines "special education" as "specially designed instruction" that—

- Addresses the child's unique disabilityrelated needs, and
- Enables the student to progress towards educational standards

#### Rehabilitation Act

Under the Rehabilitation Act Amendments of 1998, a

youth is eligible to receive vocational rehabilitation services if:

- A) He or she has a physical or mental impairment; and
  - The impairment constitutes, or results in, at least one substantial impediment to employment which is consistent with his or her abilities and capabilities; and
  - The individual can benefit in terms of an employment outcome from the provision of vocational rehabilitation services; and
  - The individual needs substantial vocational rehabilitation services to prepare for, secure, retain or regain employment which is consistent with strengths, resources, priorities, concerns, abilities, capabilities and interests.
- B) He or she is currently receiving and/or is entitled to SSI and/or SSDI benefits for disability or blindness; and he or she intends to become employed.

In other words, a person must have a disability that interferes with the ability to work and must need vocational rehabilitation services to obtain or maintain employment. A person is presumed to be able to become employed unless DVR has clear and convincing evidence that the person cannot become employed. Transition services, as defined under the Rehabilitation Act, are provided to all eligible youth with disabilities who can benefit from these services. This includes youth within the special education system, as well as youth within the general education system.

## Carmen

Carmen is 18 years old. She has been eligible for Special Education Services since 6th grade, with a Significant Identifiable Emotional Disability. Carmen is several credits short of graduation and is three months pregnant with her first child. She is considering dropping out of school. Carmen was referred by the school social worker to the local School to Work Alliance Program (SWAP). SWAP is a collaborative effort between DVR and the local school district. SWAP offers services leading to employment. The school social worker has connected Carmen with the teen pregnancy program offered through the school district. Carmen's teacher is assisting her with credit completion by arranging that she receive credit for some of her vocational and independent living activities, and by providing tutoring assistance. Carmen's DVR counselor arranged for a vocational evaluation and provided

counseling that resulted in Carmen choosing the vocational goal of Certified Nursing Assistant (CNA). The SWAP Coordinator arranged short-term skills training that resulted in Carmen attaining her CNA certification and is assisting Carmen in her search for employment. Because Carmen meets the DVR financial need test, DVR provided uniforms and shoes, and is assisting with transportation. The SWAP Coordinator has referred Carmen to the local Mental Health/DVR Youth Enhancement Program where Carmen is receiving counseling support as she deals with the stress of exiting school, beginning a career, and becoming a parent. Carmen has also been connected with the local Workforce Center, which will assist her with childcare costs and other supportive services following the birth of her child and her return to work.

# What Are The Roles And Responsibilities Of Each System?

Both the public education and vocational rehabilitation systems have been given responsibility for the provision of transition services to students with disabilities through Federal statute. However, there may be some overlap in services and the respective roles of each agency can sometimes be difficult to distinguish.

#### **Education's Role and Responsibility**

It is the school's responsibility to plan and provide those services that will prepare the student to move successfully from school to the appropriate post-school environment and to assist the student to connect with the necessary community agencies, including vocational rehabilitation, that will provide support services. The post-school outcomes for post-secondary education or training, employment, and independent living are identified as part of the Individualized Education Program (IEP) planning process and are based upon the student's preferences, interests and needs. Transition services, including work experience, that are educational and experiential in nature, are the responsibility of the local education agency. Appropriate services include:

- Planning and IEP development based on the student's post-school goals
- Academic preparation for post-secondary education and training
- Vocational and career evaluation
- Job shadows and job tryouts
- Work experience
- Vocational education classes

#### **DVR's Role And Responsibility**

Transition responsibilities were included in the Rehabilitation Act to assure that there are no gaps in services received by students with disabilities as they leave the school setting and/or are ready to begin vocational activities when an employment outcome is the primary focus. To this end, DVR is responsible to perform outreach and identification of students with disabilities, and must provide information about the purpose of vocational rehabilitation, eligibility requirements, application procedures, and the scope of vocational rehabilitation services that are available. Transition services provided by DVR are individualized, and must lead to an employment outcome. Appropriate services include:

- Consultation and technical assistance as early as possible in the transition process to assist education providers in planning for the transition of a youth from school to post-school activities including vocational rehabilitation
- Joint planning to facilitate the development and completion of the IEP
- · Determination of eligibility for DVR services
- Identification of a suitable employment outcome
- Development and approval of an Individualized Plan for Employment (IPE) before the student leaves school
- Provision of vocational rehabilitation services as appropriate to the individual needs of the student.

Many areas of service overlap and may be shared by education and vocational rehabilitation. Refer to the Collaborative Services Chart on page 6 for specific service area responsibilities.

#### How Do You Plan For Transition Services?

IDEA contains detailed requirements for planning the education of individual students including specific instructions for the development of the Individualized Education Program. In schools, planning to prepare youth for the transition to adult life begins by age 14. From this age on, the IEP must include a statement of "transition needs" that focuses on the course of study required for the student to reach his or her identified post-school outcomes. When the student turns 16, and earlier if appropriate, IEPs must include statements of specific "transition services," including interagency linkages.

When appropriate and feasible, the DVR counselor may participate in a school district's planning meeting for transition services. A primary role of DVR is that of consultation and technical assistance to the schools in planning for the transition of students with disabilities from school to post-school activities, including vocational rehabilitation.

The optimum timing for DVR to begin working with a student with a disability is when he or she is ready, and available, to engage in the activities necessary to establish an employment goal, develop an employment plan, and participate in vocational services in order to become employed. The time at which this occurs is unique to each individual, and does not necessarily correspond to a specific age or a specific event such as graduation. Rather, it should occur at a time when the youth's emphasis shifts from an academic focus to an employment focus, and the youth becomes available for vocational programming.

DVR requires that the employment plan for a DVR transition customer (not on a deferred services waiting list) must be developed and approved before the student leaves the school setting. This plan is called an Individual Plan for Employment (IPE) and, for special education students, must be coordinated with the student's IEP.

# **Timothy**

Timothy is a 17-year old with mild cerebral palsy. He lives in a rural part of Colorado, where access to adult agencies and services is difficult. The DVR office is 130 miles away. Timothy receives educational accommodations under a 504 plan. He will be graduating within the next two years. He is taking auto body classes at the high school, but is struggling with the physical demands of the program. His auto body teacher suggested he learn more about options that might be available to him through DVR. Timothy was able to gather a great deal of information about DVR, including brochures with information on eligibility and services, through the high school guidance counselor. Additionally, the counselor arranged for Timothy and his parents to be present the following month when the DVR counselor was in town to provide information on DVR to

students and parents. Due to the logistical difficulty of attending 504 and IEP meetings for all students who may be DVR eligible, the counselor has thoroughly explained DVR, including eligibility requirements and services, to key school staff. Additionally, she does a presentation on DVR each semester at the high school's parent information night. Following their attendance at the DVR meeting, Timothy and his parents elected to initiate a referral to DVR. Timothy and his guidance counselor contacted the DVR counselor by phone, and made an appointment with her during her next regularly scheduled visit. The guidance counselor assisted Timothy and his parents as they collected school assessment information and prepared a referral packet to be presented to the DVR counselor at Timothy's intake meeting.

### What Is The Referral Process For DVR?

Referral to DVR may be initiated by anyone. Typically, referrals come from the schools, an individual, a family member or a community agency. Students referred to DVR may be participants in special, vocational or regular education programs.

Although there are state-level agreements in place, it is encouraged that local school districts and DVR offices develop, or review existing working agreements which identify respective roles of each agency and include a process for referring students to DVR. Typically, a "referral packet" to DVR will include:

- A "referral to DVR" form
- Psychological, medical and specialty evaluations such as adaptive behavior, mobility, speech and language, hearing, etc.
- Completion of DVR's "Educational Disability Report"
- The most recent IEP and/or Triennial
- The 504 plan, if applicable

- School transcripts, if appropriate
- Vocational assessment results, including functional vocational evaluation
- Information regarding a youth's prevocational and vocational activities through the school, including community experiences and school-tocareer activities
- Other available assessments, plans or information as deemed appropriate

Working with the local school district and other agencies that may be involved with a youth, the DVR counselor will identify and coordinate diagnostic assessments that will be needed to determine eligibility and planning for DVR services. The process of eligibility determination is greatly enhanced when the DVR counselor is able to obtain documentation of a student's disability and adaptive behavior from a school psychologist or other professionally qualified person.

#### Where Can DVR And The Schools Collaborate In Service Provision?

The 2002 COOPERATIVE AGREEMENT between the Colorado Department of Education and the Colorado Division of Vocational Rehabilitation identifies the policies, procedures and practices that can be coordinated for youth who are of transition age and are still connected with the public school system. Within this Agreement, policies, practices and procedures are categorized into the following areas:

- Assessment
- Transition Planning

- Career Development
- Preparation for Community Living
- Related Services
- Assistive Technology
- Auxiliary Aides
- Transportation
- Miscellaneous

These areas of responsibility are summarized on the Collaborative Services Chart on the next page. A copy of the Agreement can be obtained from CDE or DVR.

#### Evan

Evan is a 15-year old sophomore who is receiving special education services at his local high school due to his Attention Deficit Disorder and the resulting need for educational accommodations. His parents recently attended a transition planning workshop, where they heard a presentation about DVR. Evan's parents have asked that the local DVR counselor be invited to his annual IEP meeting. The DVR counselor was able to attend this initial planning meeting. Currently, Evan is attending classes full time and his primary focus is academic. Since Evan has not reached a point where his focus has shifted from academic to vocational, and he is not available for vocational service provision due to a full course load, he will not yet be formally referred to DVR. For now, the primary

role of the DVR counselor is to assist the IEP team in developing IEP goals and objectives that support successful transition to work and community. The DVR counselor, and the transition coordinator, will share information on DVR and other community resources with Evan and his parents. In anticipation of referral to DVR, which will probably occur at the end of Evan's junior year, Evan and his parents will contact the DVR counselor annually, to keep the counselor informed of Evan's vocational activities and readiness. Throughout Evan's senior year, the DVR counselor will work with Evan, his parents, and his teachers to determine all of Evan's vocational rehabilitation needs. In this way, Evan's IPE will be in place before he leaves the school system.

# What Policies And Practices May Affect Transition?

#### Education

# Participation in the General Curriculum in the Least Restrictive Environment

Special education is instruction and services designed to enable a student to meet educational standards in the general curriculum. This means that students will be educated in the regular classes, with appropriate supports, to the maximum extent possible. The IEP team, including the student and the parent(s), makes decisions about the appropriate course of study based on the individual needs of the student.

#### Free Appropriate Public Education

All IDEA-eligible students are entitled to a free appropriate public education (FAPE) consisting of an appropriate elementary or secondary education that meets state standards. This means that parents can not be charged for the special education or related services that may be required for their son or daughter to benefit from general education. This entitlement does not follow the student into most post-secondary programs and activities, including DVR.

#### Parent Rights and Responsibilities

IDEA includes detailed procedures for resolving disputes between parents and schools regarding the education and services, including transition services, that are provided to a student with disabilities. These include voluntary mediation, a federal complaint process, and due process hearings.

#### Student Participation and Self-Determination

IDEA strengthens the importance of self-determination and empowerment. Beginning at the age of 14, schools must invite the student to attend any meeting at which transition services will be discussed and to participate in the discussion of his or her future goals and plans. If the student does not attend, the school must take other steps to ensure that the student's preferences and interests are considered. Active participation at an early age will better prepare students to make decisions for themselves as they become young adults.

# <u>Amy</u>

Amy is 19 years old and was identified with Significant Limited Intellectual Capacity (SLIC) in first grade due to a full scale IQ of 63 and comparable adaptive behavior. She is currently receiving educational services in a community-based Transition Program for 18-21 year olds who have completed their academic programs, but who continue to need assistance as they transition from school to work and community. Although Amy walked through graduation ceremonies with her class (a social graduation), she and her parents are planning that she will remain in the Transition Program until she turns 21. Throughout the last several years, Amy has undergone formal vocational assessment and career exploration through the school district. She worked at three in-school placements before she entered the Transition Program. Last semester, Amy's teacher located a community work experience as a mail clerk. Amy received job coaching from the school paraprofessional in her work experience. Amy has expressed an interest in pursuing this type of work on a permanent basis. She will need coaching in her new position due to her difficulty in learning new tasks. Amy's DVR counselor and the Transition Program staff will share job placement responsibilities. The IPE that has been developed with Amy indicates that DVR will provide job coaching when a job placement is found. Amy has expressed a desire to live away from home, and Amy's parents will coordinate residential services with the local community centered board (CCB), with the hope of placing Amy in a group home within the next two years. The CCB will work with Amy's teacher from the Transition Program to address Amy's social and recreational needs. Transportation to Amy's job site will be by bus. Amy's parents will purchase her bus pass and the school district will provide bus training.

#### **Vocational Rehabilitation**

#### **Informed Choice**

Throughout his or her involvement with DVR, an individual is provided opportunities and assistance to exercise informed choice. Individuals are encouraged to consider a variety of alternatives as these relate to assessment, determination of a vocational goal, development of a vocational plan, selection of services and service providers, and determination of successful case closure. Individuals are encouraged to make and implement their own informed choices.

# Comparable Benefits, Individual Contribution and Least Cost

Comparable benefits available under any other program must be used to pay for DVR services, unless the benefits will interfere with or delay services to an individual who is at extreme medical risk.

Some DVR services consider the economic need of the individual with a disability and his or her family unit. Parents are considered part of a youth's family unit if they are claiming the youth as a dependent for income tax purposes. Based on the determination of economic need, the available monthly resources of the family unit must be applied to a youth's vocational rehabilitation program.

The exception to this requirement occurs if a youth is receiving SSI or SSDI. If this is the case a youth's economic need is not considered in the development and implementation of the IPE.

DVR services that are provided to an individual must be at the least possible cost to DVR insofar as they are adequate to meet the vocational rehabilitation needs of the individual.

# Unpaid Community-Based Employment Experiences

The U.S. Department of Labor has very specific guidelines for students and adults who are receiving vocational experiences in businesses without pay. Whenever an employment relationship exists, an employer will be held responsible to fully comply with all applicable sections of the Fair Labor Standards Act (FLSA). This means that the employer is required to compensate the individual unless *all* of the following criteria for a non-employment relationship are met. These guidelines prevent students and vocational rehabilitation customers from being used as "free labor" and/or displacing other workers. Unpaid community based work experiences can be very beneficial to a person's vocational development and are allowed for vocational exploration, assessment and training. These requirements can help DVR counselors and individuals with disabilities structure assessments and training programs with employers who do not wish to consider the participant to be an employee:

- The community based placement is documented and clearly defined on the individual's IEP, vocational rehabilitation assessment and/or IPE.
- The individual does not displace or reduce the hours of an existing employee.
- The individual will be under direct supervision. by either a school representative, a vocational rehabilitation service provider, or an employee of the business.
- The activities of the individual do not result in an immediate advantage to the business, or the advantage is clearly offset by the burden of training and supervision.
- The individual is working for training purposes and does not expect, or is not entitled to, a position after completion of the experience.
- The individual voluntarily participates in the training with the understanding that no wages or benefits will be available for this vocational experience.
- The total hours of the experience will, as a general rule, not exceed;
  - 5 hours for vocational exploration per job experience (career awareness, job shadowing, job site evaluation)
  - 90 hours for vocational assessment per job experience (situational assessments)
  - 120 hours for vocational training per job experience (work adjustment training, job skill training, job coaching).

#### Order of Selection

When DVR cannot serve all eligible individuals due to lack of resources, all people who apply and are found eligible for DVR services will be placed into one of the following priority categories:

1) individuals with most significant disabilities;

2) individuals with significant disabilities; or, 3) all other individuals. When it is impossible to serve all individuals, eligible persons will be served according to their priority categorization. Those who are most significantly disabled will be served first, followed by those who are significantly disabled, and then by all others. Those who do not receive the full range of DVR services may be provided with information and referral services.

#### Client Rights and Responsibilities

A customer of DVR services has certain rights and responsibilities. For example, a customer can appeal any decision at any time, and can contact the Client Assistance Program (CAP) for assistance with the

appeal, and for advocacy services. A responsibility of all DVR customers is to be an active participant in developing and following their IPE. There are other rights and responsibilities that a youth should be aware of. These will be explained to the youth and his or her family by the DVR counselor.

#### Case Closure

A Colorado DVR customer's case will be closed at some point in time. DVR services are not ongoing, lifetime services. Ideally, a case will be closed successfully rehabilitated (meaning employed or "status 26" in DVR terminology) when the individual, the DVR counselor, and others working with the individual agree that he or she has reached their employment goal and no longer requires DVR services to maintain employment. A DVR case file can also be closed because someone is ineligible for DVR services, or for other reasons such as refusing services or failure to cooperate.

# Charlie

Charlie is a 17-year old high school junior with a visual impairment that is progressive in nature. He also has a learning disability. Charlie has chosen to take traditional academic classes, and has required intensive resource room support to achieve passing grades. Charlie has three semesters remaining and plans to graduate with his class. He wants to continue his education at the community college. Charlie's vocational experiences have been quite limited. However, he did take the PSAT test this year, has toured several local businesses, and has listened to several guest speakers through the district's School to Career efforts. Charlie is perceived by others as quite angry and is having some difficulties adjusting to his progressive vision loss. He is receiving counseling from the school social worker. Charlie has been referred to DVR for assistance with his future vocational plans. To expedite this referral, the school has updated educational, vocational and vision assessments. Test results indicate that Charlie could be successful in an academic setting with the support of a tutor and assistive technology. Charlie, his parents, the DVR counselor and the school team jointly developed Charlie's IEP. The schools will provide Charlie with vocational assessment, guidance and counseling. They will connect him with the local Workforce Center to access their assessment and vocational exploration services. The DVR counselor will also work with the schools to create several job shadows for Charlie to participate in as he works to identify a realistic employment goal. Once Charlie develops a vocational goal, Charlie, his parents and his DVR counselor will develop his IPE. Charlie's parents will explore financial aid opportunities and college entrance requirements. Following exit from high school, Charlie will probably enter a certificate or associate degree program. Charlie and his parents will cover tuition, fees and transportation, unless Charlie meets the DVR financial needs test at that time. If it is determined that Charlie's current assistive technology will be useful in his post-school setting, based upon an evaluation performed by DVR, Charlie's assistive technology devices may be purchased from the school at a mutually agreed upon price. Based on the results of the financial needs test, DVR may assist with this purchase. Upon completion of Charlie's training, DVR will assist him with job placement.
